## Summary

Software developer with 3 years and 7 months of experience in web development and currently extending my knowledge in mobile app development and more backend services. I believe in "learning by doing" which served me a lot and helps me to grow day-by-day in my career.

## Skills

React JS - Advanced

Next JS - Beginner

Node JS - Beginner

React Native - Beginner

Typescript

Basic knowledge on AWS concepts, Jenkins, Docker,  
Github actions, Git, GraphQL

## Professional Experience

### Front-end Lead - iResponsive Solutions

January 2024 - Present

Currently leading a front-end team whose responsibilities are to build a forum based **React Native** mobile app and a web app for the same using **React JS**.

### Software developer - Contract based developer at SSENSE from iResponsive Solutions

August 2022 - January 2024

Worked as a contract based developer at SSENSE from iResponsive Solutions in a project that includes technologies like **React JS**, **React Native**, **Node JS**, **Micro services** and **Vue JS**.

Gained knowledge on **Docker**, **AWS concepts (project requirements)**, **Github actions**, **Jenkins**

### Front-end Lead - AVEON InfoTech

July 2022 - December 2022

Led a front-end team to build a web app with React JS for maintaining the admin responsibilities of a blood donor application and a mobile app built with React Native for user side interaction.

### Front-end Developer - AVEON InfoTech

April 2022 - June 2022

Worked on a minor React project under fee module of school management system.

Improved my knowledge on ui-component libraries like **Material UI** and **Fluent UI**.

Utilized the time to have a fundamental learning on **Node JS**.

## Front-end Developer - Leora Solutions LLC

July 2021 - April 2022

Became strong with my client interaction skills and fluent with React JS and more in-hand experience on React JS by working on nearly 3 real-time projects remotely under the domains **Business Management, Digitalization and School management** for a client at Dubai.

Became strong with the concept of **redux (redux and redux toolkit), authentication** workflow in react and developing **customised ui-components and hooks**.

Gained basic knowledge on **React Native, GraphQL, React Query**.

## Front-end Developer (Contract Based) - Leora Solutions LLC

July 2020 - July 2021

Gained my **first client interaction** skills and in-hand experience on React JS by working on nearly 4 real-time projects remotely for a client at Dubai.

Learned redux, authentication workflow in react, **graphical UI** implementations.

## Freelance Web developer

July 2020 - August 2020

Built a landing page using **React JS** with complicated UI and smooth animations meeting the requirements of the client.

**My Work:** <https://emergeability.org/>

## Software Developer Intern - Nanban tech ventures

June 2020 - July 2020

As a foundation for my aspiring career development, internship at this organisation provided me with the fundamental knowledge on web development and a great opportunity to upscale my career.

## Personal Projects

### Live Apps - Accounts

React JS, Fluent UI, Social authentication (front-end)

An **identity server** responsible to store user details in a centralised platform limited for applications partnering with [live apps](#) ([organization link](#)).

Single handedly contributed to build the front-end part using the technologies **React JS** and **Fluent UI** for developing the user interface with required redirects for the social authentication.

**Documented the usage** instruction of this identity server.

Repository link: <https://github.com/live-apps-in/ui-accounts/blob/master/README.md>

Documentation link: <https://exciting-bassoon-bbe.notion.site/Accounts-Live-Apps-bc87388482a847ce91e902e80ff10951>

## Live Apps - Landing Page

React JS, Material UI (front-end)

Landing Page to showcase and describe the technologies and partnering applications built under [Live Apps](#).

Repository link: <https://github.com/live-apps-in/live-apps-landing-page/blob/main/README.md>

Lively deployed link: <https://jaga.live/>

## Live Cord - Live Apps

React JS, Material UI (front-end)

Admin portal webpage to manage the discord bot ([kitty\\_chan](#)) permissions and user privileges.

**Single handedly contributed** on front-end part for this requirement.

Repository link: <https://github.com/live-apps-in/ui-live-cord>

## NPM package - util-functions-demo-lib-for-live-apps

Typescript

A npm package containing util functions for **cookie manipulation**, **strings** and **numbers**.

Repository link: <https://github.com/dikshit-n/bp-npm-package/blob/master/README.md>

Npm package link: <https://www.npmjs.com/package/util-functions-demo-lib-for-live-apps>

## Fitness Plus

React JS, Typescript

A web application for tracking the daily fitness data of an individual.

Repository link: <https://github.com/dikshit-n/fitness-plus/blob/main/README.md>

Lively deployed link: <https://fitness--plus.web.app/>

## Portfolio

React JS, Javascript

My own portfolio built with react js. This is **not up-to-date** yet

Repository link: <https://github.com/dikshit-n/portfolio/blob/main/README.md>

Lively deployed link: <https://portfolio-dikshit-n.vercel.app/>

## Education

Bachelor of Technology (IT)

Sri Krishna College of Engineering and Technology.
