Senior Frontend Engineer

Senior Frontend Engineer with nearly 6 years of experience specializing in React.js, React Native, Typescript, Node js and AWS with hands-on experience of integrating backend services. Technical owner of an offline-first healthcare mobile app processing 10,000 appointments/day.

WORK EXPERIENCE

iResponsive Offshore Development Center Pvt. Ltd. **05/2023 - 05/2026**

Senior Software Engineer (SDE 3) **Coimbatore (Remote)**

- Held **Technical ownership** for a US client's **offline-first** healthcare app on **Android** (iOS-compatible), architected on AWS AppSync, Amplify, GraphQL, and Lambda to achieve 100% offline-reliable data flow.
- Led cross-functional **collaboration** with product, UI/UX designs, QA, backend engineers and engineering stakeholders in an **Agile/Scrum** cadence, reliably processing 10,000 appointments/day.
- Built reusable, performant and accessible **React**, **React Native**, and TypeScript component libraries with responsive layouts, scaling across 8+ tasks in a workflow and eliminating task-tracking issues in production by using dynamic navigation.
- Translated business requirements to technical implementation, made sure user flows are intuitive in all phases to deliver an end-to-end document-signing feature.
- Architected complex **React Native background location tracking** every 5 seconds on Android with reliability, battery and memory efficiency; achieving 95% capture rate and eliminating memory crash.
- Led 5 person engineering team owning sprint planning and reviews, **mentored juniors** on best practices in React, TypeScript, and React Native; reducing **code review** cycles by 2 days.
- Maintained appointment booking web platform by shipping new reconciliation flow built across **Vue.js** and **Node.js**, that reduced the duration of in-person customer wait time by 30%.
- Researched and implemented scalable **micro-frontend architecture** proof of concept in Nuxt.js with CI/CD integrated across multiple repositories, which became the base of a multi-service web portal across 4 teams.
- Developed **AI-assisted coding** standards for a 5-engineer team by designing **MCP** (Model Context Protocol)server integrations in **Claude Code**, and creating reusable flow of **prompt engineering**, which became the **agentic development** workflow for 4 teams.

Aveon Infotech Pvt. Ltd. **04/2022 - 04/2023**

Software Development Engineer 2 (SDE 2) **Coimbatore(Remote)**

- Improved performance of a long list by implementing **infinite scrolling** and **virtualized list**, **progressive loading**, and a selective sidebar; reducing screen lag and render time to 5 ms.
- Optimized an admin dashboard with **React DevTools Profiler** using **React.memo**, **useMemo**, **useCallback** and **state colocation**; reduced render time from 100ms to 3ms in real world conditions.
- Led a 4-person front-end team to successfully deploy forum functionality on a School Management System in an **Agile/Scrum** cadence using **Material UI** and **Fluent UI**; improved article visibility within the internalsystem by 50%.
- Designed a **React + TypeScript** school front page ensuring a high **Core Web Vitals** score and meeting the **WCAG** web **accessibility** guidelines, with a **virtualized content list** and progressive content fetching to have the **LCP** (Largest Contentful Paint) under 2.5s and the **CLS** (Cumulative Layout Shift) under 0.1.
- Wrote unit and end-to-end **test coverage** using leading test frameworks like **Jest** and **React Testing Library** for components, **Cypress** and **Playwright** for cross-browser E2E to reduce manual QA cycles.

Leora Solutions **06/2020 - 03/2022**

Frontend Developer **Dubai, UAE (Remote from India)**

- Built clean and maintainable design system with theming and reusable components on top of **Material UI** and **Fluent UI**, added **React Query** and **Zustand** store to avoid redundant API calls by 50%.
- Built high-quality analytics dashboards using **React** and **TypeScript**, visualizing bar, pie, and line charts on 1,000+ business records, resulting in 90% fewer hours of reporting effort.
- Created **reusable UI components** and **custom hooks** for **Redux-based** authentication flows, improving overall development speed and reusability of components by 50%.
- Developed **React JS** web applications for UAE-based business management, digitalization, and school management clients, directly collaborating with Dubai-based delivery teams.
- Optimized bundle size and improved maintainability using **React Lazy Loading**, webpack tree shaking, and bundle splitting strategies; reducing build size from 2MB to 600KB.

SKILLS

Frontend & UI Architecture:HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Nuxt.js, Responsive Design, Web Performance, Cross-Browser Compatibility, Custom Hooks, Component Architecture, Core Web Vitals, WCAG, React DevTools Profiler.

Web Components: Lit, Custom Elements, Shadow DOM, Design Tokens, Cross-Framework Component Libraries, Native Web Components

Accessibility: WCAG 2.1 AA, ARIA, Keyboard Navigation, Screen Reader Testing, Color Contrast, Inclusive.

Testing & Tooling: Vitest, Jest, Cypress, Playwright, React Testing Library, Unit Testing, TDD, Jenkins CI, Code Coverage, Storybook, Figma Dev Mode, Technical Documentation.

State & Data: Redux, Zustand, React Query, RESTful APIs, GraphQL (AWS AppSync, AWS Amplify, AWS Lambda).

AI-Assisted Engineering: Claude Code, GitHub Copilot, Model Context Protocol (MCP), Prompt Engineering, Agentic Workflows.

Leadership & Practice: Technical Ownership, Architectural Decisions, Agile/Scrum, Story Point Estimation, Sub-Tasking, Cross-Functional Collaboration, Mentorship, Stakeholder Management.

PROJECTS

mimi-ui

- Designed and developed a framework-agnostic **UI component library** using Lit 3 / TypeScript / Vite.
- Published **public npm package**; native web components via Custom Elements + Shadow DOM (no per-framework fork for React / Vue / Angular).
- Built **CI/CD pipeline** (lint, format, test, publish via npm Trusted Publishing / OIDC, Storybook deploy).
- Authored **engineering docs**: Component Standards, Definition Of Done, Internal Architecture, Integration, Plain Usage.
- Integrated **Storybook 10** with addon-docs and addon-a11y for **accessibility** testing via axe-core.
- Wrote Vitest suite and **SASS**-based theming layer with public --m-* custom properties.
- **Repo**: https://github.com/first-apps/mimi-ui · **npm:** https://npmjs.com/package/@first-apps/mimi-ui · **Storybook**: https://first-apps.github.io/mimi-ui.

OPEN SOURCE CONTRIBUTIONS

pubkey/rxdb (23.4k stars): Diagnosed and implemented a fix for the initial-loading-state bug in the useRxDocument React hook, restoring correct values for consumers on first render.

TanStack/form (6.7k stars): Resolved a regression in the TanStack Form dev tools panel so theme switching renders correctly across light and dark modes; fix merged upstream.

TanStack/router (15.0k stars): Authored a documentation improvement in the getting-started guide, added a warning callout about the required element to prevent a common pitfall for new users.

CERTIFICATION

React – The Complete Guide (incl. Hooks, React Router, Redux) Udemy - 2020

EDUCATION

B.Tech - Information Technology Coimbatore • 2018 - 2022

Sri Krishna College of Engineering and Technology
