Accomplished Senior Frontend Engineer (SDE 3) with over 5 years of experience specializing in React.js, React Native, and frontend engineering, with foundational knowledge of backend services. Targeting React Developer and Frontend Developer opportunities across IT & Software Services.

PROFILE SUMMARY

- Gained expertise in frontend engineering, specializing in React.js, React Native, responsive web applications, and cross-platform mobile development, with foundational knowledge of backend services.
- Worked as Senior Software Engineer (SDE 3) at iResponsive Offshore Development Center, developing frontend solutions for healthcare products serving clients across the US, Canada, and UAE.
- Delivered an offline-first healthcare mobile application using React Native and Expo, supporting 10,000 appointments/day across iOS and Android and enhancing operational efficiency.
- Led a micro-frontend architecture PoC using Nuxt.js, establishing a scalable multi-service web portal approach and improving application modularity, collaboration, and deployment efficiency.
- Exhibited hands-on expertise in React.js, React Native, Expo, and modern frontend development, with supporting knowledge of Node.js, GraphQL, REST APIs, AWS services, and backend integrations.
- Provided technical ownership while mentoring and managing 4 engineers in Agile/Scrum teams, driving frontend development and collaborating on backend integrations and custom MCP server initiatives.

CORE COMPETENCIES

- Agile Methodologies
 - Software Development Lifecycle
 - Application Architecture
 - Frontend Engineering
 - Team Collaboration
- User Experience Design
 - Cross-Platform Development
 - Responsive Application Development
 - Performance Optimization
 - Technical Documentation

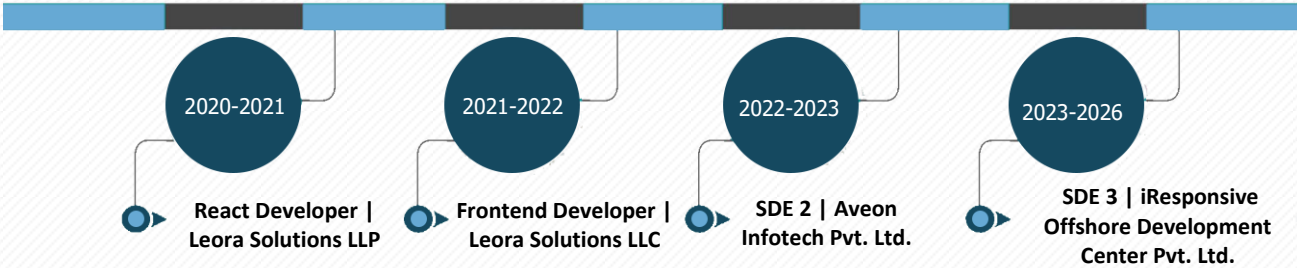

FUNCTIONAL SKILLS

- **Frontend:** React.js, Next.js, Nuxt.js, Vue.js, JavaScript, Typescript, HTML5, CSS3, Redux, Zustand, React Query
- **UI & Styling:** Material UI, Fluent UI, Tailwind CSS, SASS, SCSS, Styled Components, Responsive Design, Component Architecture, Chart.js
- **Mobile:** React Native, iOS, Android, Expo, EAS Build, React Navigation, Background Location Services, Push Notifications, Google Play Deployment, Firebase App Distribution
- **Backend & APIs:** Node.js, GraphQL, AWS AppSync, REST APIs, Firebase, Amazon DynamoDB, DynamoDB Streams, API Development, Backend Services
- **Architecture:** Offline-First Architecture, Real-Time Data Processing, Event-Driven Architecture, Workflow Engine Design, Software Architecture, Authentication Architecture, OAuth 2.0
- **Cloud & Serverless:** AWS Lambda, AWS Amplify, Amazon Cognito, Serverless Computing
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, Jenkins, CI/CD, LogZ, Webhooks, Webpack, Vite
- **Security & Compliance:** HIPAA, GDPR, Protected Health Information (PHI)
- **Quality & Leadership:** Test-Driven Development (TDD), Code Review, Quality Gates, Technical Team Leadership, Mentoring, Requirements Gathering, Stakeholder Management, Cross-Functional Coordination

CAREER TIMELINE

WORK EXPERIENCE

Senior Software Engineer (SDE 3) | iResponsive Offshore Development Center Pvt. Ltd., Coimbatore (Remote) | May 2023 – May 2026

- Architected React-based frontend solutions for offline synchronization and real-time data flows in low-connectivity healthcare environments, preventing data loss in 95% of cases while supporting PHI protection.
- Engineered an event-driven synchronization pipeline using AWS EventBridge, DynamoDB Streams, SQS, Lambda, and AppSync, decoupling Source-of-Truth API updates from downstream processing and enabling CDC-based callbacks for bidirectional data consistency across the offline-first healthcare platform.

- Developed a Micro-Frontend architecture POC using Nuxt.js and Nuxt Layers, enabling modular repository separation for web application components and facilitating dedicated ownership and responsibility across development teams.
- Engineered dynamic task workflows and configurable sequencing logic in React, enabling seamless task-based user journeys and reducing frontend complexity.
- Developed dynamic navigation stacks for task-driven journeys, eliminating tracking issues and simplifying conditional rendering across mobile application flows.
- Implemented 5-second background location capture across mobile platforms, achieving 95% reliability and redesigning memory management to eliminate application crashes.
- Established LogZ-based frontend logging and monitoring pipelines, improving production observability and enabling deployment frequency to increase from monthly to bi-weekly releases.
- Managed Google Play releases and EAS Build distribution through Firebase App Distribution, supporting controlled frontend testing and production deployment cycles.
- Led sprint planning, code reviews, technical mentoring, and frontend code-quality initiatives, reducing review turnaround by 2 days while coordinating feature delivery and defect resolution.
- Integrated React frontend flows with OAuth 2.0, Cognito, and AWS AppSync services, enabling secure authentication and API access while demonstrating foundational backend integration expertise.

Software Development Engineer 2 (SDE 2) | Aveon Infotech Pvt. Ltd., Coimbatore (Remote) | Apr 2022 – Apr 2023

- Led a 4-member Frontend Team comprising web and mobile developers to deliver forum capabilities within a School Management System.
- Implemented article and blog publishing features using Material UI and Fluent UI, reducing advertising overhead while increasing internal visibility by 50%.
- Directed delivery of an administrative web platform and companion mobile application for a blood-donor ecosystem supporting 500+ donation requests.
- Coordinated sprint execution, task allocation, technical reviews, and cross-platform delivery within an Agile/Scrum development model.
- Translated functional requirements into reusable interface modules, maintaining consistency across administrative and end-user experiences.
- Collaborated with stakeholders and engineers to resolve implementation challenges, stabilize releases, and maintain delivery quality across concurrent initiatives.

Project:

Blood Donor Management App

- Contributed to a full-stack Blood Donor Management App using React.js, React Native, Node.js, MongoDB, and RabbitMQ, supporting end-to-end donor, recipient, hospital, and admin workflows, with working knowledge of backend architecture and integrations.
- Developed frontend interfaces using React.js and React Native, implementing OAuth 2.0 authentication with Google and Microsoft, Formik and Yup form validation, and responsive workflows across donor, recipient, hospital, and admin modules.
- Contributed to blood request & donor-matching workflows based on blood group mapping, location & availability, including real-time push notifications, Accept/Reject functionality, hospital QR-based blood requests, OTP generation/verification, RBAC, authentication & donation lifecycle management.
- Gained working knowledge of the application's event-driven architecture using RabbitMQ, including asynchronous notification/certificate processing, retry and dead-letter queues, and idempotent consumers for transaction reliability and prevention of duplicate transactions.
- Worked with project-level security, validation, database, and observability mechanisms, including TLS, CSRF/CSP/XSS protection, request validation, OTP expiry/attempt controls, audit logging, MongoDB indexing/TTL, and OpenTelemetry distributed tracing.

Frontend Developer | Leora Solutions LLC Dubai, United Arab Emirates (Remote from India) | Jul 2021 – Mar 2022

- Developed the frontend for Soutrali, a UAE cab-booking administration platform, reducing cash-based transactions by 90%.
- Built personalized advertising and discount capabilities for EzWalkin, contributing to a 20% increase in sales while improving customer engagement.

React Developer | Leora Solutions LLP, Kerala (Remote) | Jun 2020 – Jul 2021

- Engineered reusable UI components, custom hooks, and Redux authentication workflows, increasing development speed and component reuse by 50%.
- Developed QR-driven business digitization, school tracking, visitor management, and analytics solutions with Material UI and Chart.js, eliminating 90% of manual reporting effort.

EDUCATION

B.Tech. - Information Technology | Anna University, Chennai | 2022 | CGPA 8.49

VOLUNTEERING HIGHLIGHTS

- Contributed documentation improvements to electric-sql/electric (10.3K+ GitHub stars, Apache-2.0), adding cross-links that enhanced discoverability of error-handling guidance for end users.
- Collaborated with open-source maintainers, incorporating feedback professionally and delivering an accepted contribution within 33 hours of submission.

CERTIFICATION

- React – The Complete Guide (Hooks, React Router, Redux) | Udemy | 2020

PERSONAL DETAILS

- Languages Known: English and Tamil
- Address: Namakkal, Tamil Nadu
- Date of Birth: 14th June 2001
