Portfolio: https://dikshit.pro

A competent Senior Software Engineer (SDE 3) with over 5 years of experience in React.js, React Native, and Full-Stack Development, aspiring to drive innovative solutions across IT & Software Services startups across India. Targeting opportunities in Frontend Engineering, React.js Development, and Full-Stack Development.

PROFILE SUMMARY

- Built expertise in frontend engineering and full-stack development, specializing in React.js, backend development, and cross-platform mobile application development.
- Previously worked as Senior Software Engineer (SDE 3) at iResponsive Offshore Development Center, developing healthcare solutions for US, Canadian, and UAE clients.
- Delivered an offline-first healthcare mobile application processing 10,000 appointments/day across iOS and Android, enhancing operational efficiency.
- Led a micro-frontend architecture PoC using Nuxt.js, establishing a scalable multi-service web portal approach and improving collaboration and deployment efficiency.
- Exhibited proficiency in React Native, Expo, Node.js, GraphQL, AWS Lambda, AWS Amplify, AWS AppSync, Amazon DynamoDB, DynamoDB Streams, REST APIs, and event-driven backend development.
- Established strong technical ownership while managing 4 engineers in Agile/Scrum teams, combining cross-platform mobile and web full-stack capabilities with custom MCP server development.

CORE COMPETENCIES

- Agile Methodologies
- Software Development Lifecycle
- Data Synchronization
- Microservices Architecture
- Team Collaboration
- User Experience Design
- Cross-Platform Development
- Cloud Architecture Design
- Performance Optimization
- Technical Documentation

FUNCTIONAL SKILLS

- **Backend & APIs:** Node.js, GraphQL, AWS AppSync, REST APIs, Firebase, Amazon DynamoDB, DynamoDB Streams, API Development, Backend Services
- **Frontend:** React.js, Next.js, Nuxt.js, Vue.js, JavaScript, Typescript, HTML5, CSS3, Redux, Zustand, React Query
- **UI & Styling:** Material UI, Fluent UI, Tailwind CSS, SASS, SCSS, Styled Components, Responsive Design, Component Architecture, Chart.js
- **Mobile:** React Native, iOS, Android, Expo, EAS Build, React Navigation, Background Location Services, Push Notifications, Google Play Deployment, Firebase App Distribution
- **Cloud & Serverless:** AWS Lambda, AWS Amplify, Amazon Cognito, Serverless Computing
- **Architecture:** Offline-First Architecture, Real-Time Data Processing, Event-Driven Architecture, Workflow Engine Design, Software Architecture, Authentication Architecture, OAuth 2.0
- **DevOps & Tools:** Git, GitHub, GitHub Actions, Docker, Jenkins, CI/CD, LogZ, Webhooks, Webpack, Vite
- **Security & Compliance:** HIPAA, GDPR, Protected Health Information (PHI)
- **Quality & Leadership:** Test-Driven Development (TDD), Code Review, Quality Gates, Technical Team Leadership, Mentoring, Requirements Gathering, Stakeholder Management, Cross-Functional Coordination

WORK EXPERIENCE

Senior Software Engineer (SDE 3) | iResponsive Offshore Development Center Pvt. Ltd., Coimbatore (Remote) | May 2023 – May 2026

- Architected offline synchronization and real-time data flows for low-connectivity healthcare environments, preventing data loss in 95% of cases while supporting PHI protection.
- Engineered a task workflow engine with dynamic sequencing logic, determining subsequent actions from outcomes against configurable workflow structures.
- Developed dynamic navigation stacks for task-based journeys, eliminating tracking issues and reducing conditional rendering across native platform flows.
- Implemented 5-second background location capture across mobile platforms, achieving 95% reliability before redesigning memory managing to eliminate application crashes.
- Established LogZ-based metrics and logging pipelines, accelerating deployment frequency from monthly to bi-weekly releases and strengthening production observability.

- Managed Google Play releases and EAS Build distribution through Firebase App Distribution, supporting controlled testing and production deployment cycles.
- Directed sprint planning, reviews, technical mentoring, and code-quality initiatives, reducing review turnaround by 2 days while coordinating feature delivery and defect resolution.
- Engineered an OAuth 2.0–Cognito authentication bridge and device credential flow, enabling secure AppSync access without disrupting the established authentication context.

Software Development Engineer 2 (SDE 2) | Aveon Infotech Pvt. Ltd., Coimbatore (Remote) | Apr 2022 – Apr 2023

- Led a 4-member Frontend Team comprising web and mobile developers to deliver forum capabilities within a School Management System.
- Implemented article and blog publishing features using Material UI and Fluent UI, reducing advertising overhead while increasing internal visibility by 50%.
- Directed delivery of an administrative web platform and companion mobile application for a blood-donor ecosystem supporting 500+ donation requests.
- Coordinated sprint execution, task allocation, technical reviews, and cross-platform delivery within an Agile/Scrum development model.
- Translated functional requirements into reusable interface modules, maintaining consistency across administrative and end-user experiences.
- Collaborated with stakeholders and engineers to resolve implementation challenges, stabilize releases, and maintain delivery quality across concurrent initiatives.

Project:
Blood Donor Management App

- Engineered a full-stack Blood Donor Management App using React.js, React Native, Node.js, MongoDB, and RabbitMQ, enabling end-to-end donor, recipient, hospital, and admin workflows.
- Developed blood request and donor-matching workflows based on blood group mapping, location, and availability, with real-time push notifications and Accept/Reject functionality.
- Implemented secure hospital QR-based blood requests, OTP generation/verification, RBAC, authentication, and donation lifecycle management from request creation through completion.
- Built an event-driven architecture with RabbitMQ, asynchronous notification/certificate processing, retry and dead-letter queues, and idempotent consumers to prevent duplicate transactions.
- Strengthened platform security and observability through TLS, CSRF/CSP/XSS protection, request validation, OTP expiry/attempt controls, audit logging, MongoDB indexing/TTL, and OpenTelemetry distributed tracing.

Frontend Developer | Leora Solutions Dubai, United Arab Emirates (Remote from India) | Jun 2020 – Mar 2022

- Developed the frontend for Soutrali, a UAE cab-booking administration platform, reducing cash-based transactions by 90%.
- Built personalized advertising capabilities for EzWalkin, contributing to a 20% increase in sales while improving customer engagement.
- Engineered reusable UI components, custom hooks, and Redux authentication workflows, increasing development speed and component reuse by 50%.
- Developed QR-driven business digitization, school tracking, visitor management, and analytics solutions with Material UI and Chart.js, eliminating 90% of manual reporting effort.

EDUCATION

B.Tech. - Information Technology | Sri Krishna College of Engineering and Technology, Coimbatore | 2022 | CGPA 8.49

VOLUNTEERING HIGHLIGHTS

- **pubkey/rxdb (23.4k stars):** Diagnosed and implemented a fix for the initial-loading-state bug in the useRxDocument React hook, restoring correct values for consumers on first render.
- **TanStack/form (6.7k stars):** Resolved a regression in the TanStack Form devtools panel so theme switching renders correctly across light and dark modes; fix merged upstream.
- **TanStack/router (15.0k stars):** Authored a documentation improvement in the getting-started guide, added a warning callout about the required element to prevent a common pitfall for new users

CERTIFICATION

- React – The Complete Guide (Hooks, React Router, Redux) | Udemy | 2020

PERSONAL DETAILS

- Languages Known: English and Tamil
- Address: Namakkal, Tamil Nadu
- Date of Birth: 14th June 2001
